- Team Recruiting & Leadership
- Cross-Functional Collaboration
- Client Support

### PROFESSIONAL EXPERIENCE

#### **1000Farmacie., Remote** **Senior Frontend Developer**

**2/2023 – present**

Joined as Lead Front-End Developer at a dynamic startup marketplace, 1000farmacie.it. I take immense pride in spearheading front-end development processes, driving transformative changes, and enhancing user experiences. One of my significant accomplishments has been boosting page-speed performance, resulting in better organic rankings on Google search results.

#### **Svitla Systems, Inc., Remote** **Senior Frontend Developer**

**1/2019 – 12/2022**

Ensured stellar performance of key platforms and tools as a senior frontend developer, steering a team of development and UI professionals in designing, testing, and executing innovative and engaging interfaces. Partnered with clients to shape and deliver custom applications and technology solutions.

- **Create Me:**
  - Collaborated on creating an innovative application for physical kiosk devices, enabling customers to order/purchase materials in real time.
  - Delivered kiosk and standalone mode for USA/UK rollout, creating the from-scratch multi-page application (MPA) through to production.
  - Collaborated with designers to unify and optimize UI/UX and customization.
- **Noodle Learning Platform:**
  - Designed and launched new functionalities for the cutting-edge educational platform, driving UI/UX improvements to meet user needs.
  - Led testing and development processes to enhance platform stability and production readiness, delivering accuracy through timely feature launches.

## LANGUAGES

English  
Ukrainian  
Russian

- Enabled the delivery of captivating educational content, providing seamless user access to materials.
- Developed innovative, eye-catching visuals, leading UI staff in developing SVG animations based on JSON data and cross-devised adapted experiences for market-leading experiences.

- **Clearstream/Deutsche Börse Group Companies:**

- Headed portal improvement developments, significantly improving upload and validation processes through automation implementation.
- Developed and initiated key security and performance initiatives to provide top-tier, all-day stability within the client-critical portal.
- Designed and developed a live single-page application (SPA) process, embedding multiple interval actions and creating all-new upload processes for optimal efficiency.
- Governed SPA to maximize bank and employee collaboration processes within protected Financial Security documents.

### **Infront X (previously Omnigon Communications LLC) Senior Frontend Developer, Kyiv/Remote**

**2/2015 – 12/2018**

Partnered with diverse clients to provide dynamic, reactive interfaces for client application and website needs. Led cross-functional project teams, including designers and UI/UX developers, to shape impactful tools in line with unique client and user requirements.

- **PGA Tour:**

- Maximized the performance and capabilities of the US's premiere golf website, developing innovative features and functions to enable streamlined, highly accurate information sharing.
- Steered component migration initiative, transitioning features from jQuery to React for optimal performance and up-to-date functionality.
- Completed a 99.8% coverage with unit test.

- **The Corebine CMS:**

- Led a small team in the design and execution of an all-new Content Management System (CMS) for creating sport-related websites, transforming content management capabilities.
- Successfully developed product over a one-year timeframe, with completion of product demo website in three months.
- Enabled rapid website development (3-6 months) through new CMS implementation and application.

### **NOOSPHERE, Dnipro Frontend Web Developer**

**9/2014 – 1/2015**

Collaborated with the product team to develop an internal SPA, providing key capabilities for the Support Team.

- Designed and developed an all-new functionality, delivering new design and capability in line with business needs.
- Executed the migration from Ext JS 4 to Ext JS 5, eliminating major incompatibilities for optimal performance.

### **Independent, Dnipro Frontend Developer**

**9/2009 – 9/2014**

Consulted with small- and mid-range businesses to provide frontend development across a wide range of web initiatives. Built cross-functional, project-specific teams, recruiting designers, backend development, and writing talent to deliver on unique client website and application demands.

- Provided server-side rendering, delivering dynamic websites for diverse needs.
- Executed high-impact SEO and website promotion, elevating sites to Google and Yandex Top 10 to maximize client outcomes.
- Maintained products and applications, ensuring ongoing performance and capabilities for lasting client success.

## EDUCATION

**Master's Degree in Computer Systems, Energy, and Automation**  
National Metallurgical Academy, Ukraine
