- Cross-Functional Collaboration
- Client Support

PROFESSIONAL EXPERIENCE

Svitla Systems, Inc., Remote   **1/2019 – 12/2022**
Senior Frontend Developer

Ensured stellar performance of key platforms and tools as a senior frontend developer, steering a team of development and UI professionals in the design, testing, and execution of innovative and engaging interfaces. Partnered with clients to shape and deliver custom applications and technology solutions.

- **Create Me:**
  - Collaborated on creating an innovative application for physical kiosk devices, enabling customers to order/purchase materials in real-time.
  - Delivered kiosk and standalone mode for USA/UK rollout, creating the from-scratch multi-page application (MPA) through to production.
  - Collaborated with designers to unify and optimize UI/UX and customization.
- **Noodle Learning Platform:**
  - Designed and launched new functionalities for the cutting-edge educational platform, driving UI/UX improvements to deliver on user needs.
  - Led testing and development processes to enhance platform stability and production readiness, delivering accuracy through timely feature launches.
  - Enabled the delivery of captivating educational content, providing seamless user access to materials.
  - Developed innovative, eye-catching visuals, leading UI staff in developing SVG animations based on JSON data and cross-devised adapted experiences for market-leading experiences.
- **Clearstream/Deutsche Börse Group Companies:**
  - Headed portal improvement developments, significantly improving upload and validation processes through automation implementation.

LANGUAGES

English
Ukrainian
Russian

- ○ Developed and initiated key security and performance initiatives to provide top-tier, all-day stability within the client-critical portal.
- ○ Designed and developed a live single-page application (SPA) process, embedding multiple interval actions and creating all-new upload processes for optimal efficiency.
- ○ Governed SPA to maximize bank and employee collaboration processes within protected Financial Security documents.

Infront X (previously Omnigon Communications LLC)   2/2015 – 12/2018
Senior Frontend Developer, Kyiv/Remote

Partnered with diverse clients to provide dynamic, reactive interfaces for client application and website needs. Led cross-functional project teams, including designers and UI/UX developers, to shape impactful tools in line with unique client and user requirements.

- **PGA Tour:**
  - ○ Maximized the performance and capabilities of the US's premiere golf website, developing innovative features and functions to enable streamlined, highly accurate information sharing.
  - ○ Steered component migration initiative, transitioning features from jQuery to React for optimal performance and up-to-date functionality.
  - ○ Completed a 99.8% coverage with unit test.
- **The Corebine CMS:**
  - ○ Led a small team in the design and execution of an all-new Content Management System (CMS) for creating sport-related websites, transforming content management capabilities.
  - ○ Successfully developed product over a one-year timeframe, with completion of product demo website in three months.
  - ○ Enabled rapid website development (3-6 months) through new CMS implementation and application.
- **AS Roma (Corebine):**
  - ○ Directed the development of an Italy-based professional football club's official website, leveraging Corebine CMS to manage site development and launch operations with completion in five months.
  - ○ Ensured exceptional functionality, customizability, and responsiveness, utilizing AdminUI for immediate content configuration and accessibility across all device types.

NOOSPHERE, Dnipro   9/2014 – 1/2015
Frontend Web Developer

Collaborated with the product team to develop an internal SPA, providing key capabilities for the Support Team.

- Designed and developed an all-new functionality, delivering new design and capability in line with business needs.
- Executed the migration from Ext JS 4 to Ext JS 5, eliminating major incompatibilities for optimal performance.

Independent, Dnipro   9/2009 – 9/2014
Frontend Developer

Consulted with small- and mid-range businesses to provide frontend development across a wide range of web initiatives. Built cross-functional, project-specific teams, recruiting designers, backend development, and writing talent to deliver on unique client website and application demands.

- Provided server-side rendering, delivering dynamic websites for diverse needs.
- Executed high-impact SEO and website promotion, elevating sites to Google and Yandex Top 10 to maximize client outcomes.
- Maintained products and applications, ensuring ongoing performance and capabilities for lasting client success.

EDUCATION

Master's Degree in Computer Systems, Energy, and Automation
National Metallurgical Academy, Ukraine
