Master's Degree, Computer Science
National Metallurgical Academy of Ukraine

AREAS OF EXPERTISE

- Frontend Development
- UI/UX Design
- Testing & Debugging
- Maintenance & Support
- Project Design & Management
- Team Recruiting & Leadership
- Cross-Functional Collaboration
- Client Support

PROFESSIONAL EXPERIENCE

NDA, Remote **3/2024 – current**
Frontend Lead

Developing a product - finance software for processing bank transactions.
It's an SPA based on React with a modern stack under the hood (Ant Design, Vite, Styled Components, Webpack).

1000Farmacie, Remote **2/2023 – 02/2024**
Frontend Lead

I joined as a frontend lead at a dynamic startup marketplace. I built development processes in the team, fixed fundamental application building issues, upgraded the tech stack, improved SEO, and increased the company's revenue. I released many new pages, components, and user abilities. I worked closely with third-party companies to implement and improve the integration of services, including Google Ads, Facebook Pixel, Optimonk modals, Clerk Personalization, etc.

Svitla Systems, Inc., Remote **1/2019 – 12/2022**
Senior Frontend Developer

Ensured stellar performance of crucial platforms and tools as a senior front-end developer, steering a team of development and UI professionals in designing, testing, and executing innovative and engaging interfaces. Partnered with clients to shape and deliver custom applications and technology solutions.

- **Create Me:**
  - Collaborated on creating an innovative application for physical kiosk devices, enabling customers to order/purchase materials in real-time.

- ☑ XML

LANGUAGES

English - professional
Ukrainian - native
Spanish - elementary

  - Delivered kiosk and standalone mode for USA/UK rollout, creating a from-scratch multi-page application for production.
  - Collaborated with designers to unify and optimize UI/UX and customization.

- **Noodle Learning Platform:**
  - Designed and launched new functionalities for the cutting-edge educational platform, driving UI/UX improvements to meet user needs.
  - Improved development processes to enhance platform stability and production readiness. Delivered accuracy through timely feature launches.

- **Clearstream/Deutsche Börse Group Companies:**
  - **Led** portal improvement developments, significantly improving upload and validation processes through automation implementation.
  - Developed and initiated key security and performance initiatives to provide top-tier, all-day stability within the client-critical portal.
  - Designed and developed a live single-page application (SPA) process, embedding multiple interval actions and creating all-new upload processes for optimal efficiency.

Infront X (previously Omnigon Communications LLC) **2/2015 – 12/2018**
Senior Frontend Developer, Kyiv/Remote

Partnered with diverse clients to provide dynamic, reactive interfaces for client application and website needs. Led cross-functional project teams, including designers and UI/UX developers, to shape impactful tools in line with unique client and user requirements.

- **PGA Tour:**
  - Maximized the performance and capabilities of the US's premiere golf website, enable streamlined, highly accurate information sharing.
  - Steered component migration initiative, transitioning features from jQuery to React for optimal performance and up-to-date functionality.
  - Completed a 99.8% coverage with unit test.

- **The Corebine CMS:**
  - **Led** a small team in the design and execution of an all-new Content Management System (CMS) for creating sport-related websites, transforming content management capabilities.
  - Successfully developed product over a one-year timeframe, with completion of product demo website in three months.
  - Enabled rapid website development (3-6 months) through new CMS implementation and application.

NOOSPHERE, Dnipro **9/2014 – 1/2015**
Frontend Web Developer

Collaborated with the product team to develop an internal SPA, providing key capabilities for the Support Team.

- Designed and developed an all-new functionality, delivering new design and capability in line with business needs.
- Executed the migration from Ext JS 4 to Ext JS 5, eliminating major incompatibilities for optimal performance.

Contractor, Dnipro **9/2009 – 9/2014**
Frontend Web Developer
